

With the evening weather unable to decide what to do, Sunny with showers and an easterly Breeze blowing, the times were still impressive with only two riders under the 23min barrier Dave Watson with a 22m01sec and Richard Howes with a 22m47sec. Dave Boughton being first man away not having minute man to chase did a brilliant ride with a 23m14sec. No one seemed to notice that the roads were wet and it did not seem to slow them down, leaving them all looking forward to next week and hoping for better weather and even better times.
